The diagram illustrates a dependency or inheritance relationship. On the left, there are four white rectangular boxes, each containing a fully qualified Java class name followed by a specific method name. Blue arrows originate from the right side of each of these four boxes and point towards a single, larger gray rectangular box on the right. This gray box also contains a fully qualified Java class name followed by a method name. The arrows indicate that the four methods on the left are associated with or depend on the method in the gray box.
