

OncePerRequestFilter

```
classDiagram
    class OncePerRequestFilter
    class TokenFilter {
        # doFilterInternal()
    }
    TokenFilter --|> OncePerRequestFilter
```

The diagram illustrates a class hierarchy. At the top is a gray-shaded box representing the `OncePerRequestFilter` class, which is divided into three horizontal sections. Below it is a white box representing the `TokenFilter` class, also divided into three horizontal sections. A blue arrow with an open triangular head points from the top section of `TokenFilter` to the bottom section of `OncePerRequestFilter`, indicating that `TokenFilter` inherits from `OncePerRequestFilter`.
